Detailed Action

Double Patenting Rejection

1.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3.

Claims 1, 2 and 10-12 of the instant application are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 3, 4 and 10-12 respectively of prior U.S. Patent No. 6,791,715. **This is a double patenting rejection.**

4. Claims 3-8 have been cancelled.

5.

Allowed Claim

Claim 9 is allowed for the reason the prior art does not teach or suggest, "... in claimed combination, " wherein, in the halftone processing process, there are produced the image reproduction data to be used for changing an angle of at least one color screen of a plurality of color screens to substantially an angle related to an irrational tangent."
